BOWMAN TOOL & MACHINING, INC.

Complex Machining Solutions – Since 1977

Excellence is in our DNA

For more than 35 years, Bowman Tool and Machining has solved the complex machining challenges and contract manufacturing needs of some of the world's most successful companies.

By applying rigorous engineering standards along every phase of the process from specifications and prototyping to production and quality control, we deliver performance excellence that consistently exceeds expectations.

If you're in need of complex CNC machining and high tolerance components, let us put our expertise to work for you.

Full Tier-1 Support

To meet your exacting requirements, we offer full tier-1 support throughout every phase of our operation from design and prototyping to materials procurement and engineering.

Precision Machining

Our dedicated, highly skilled machinists and engineers, robotic automation and climate-controlled facilities allow us to maintain precise tolerances of even the most complex jobs.

Superior Quality

Our quality assurance personnel constantly verify accuracy from prototype through production to deliver superior quality products that flawlessly meet your specifications and standards.

Efficient Assembly

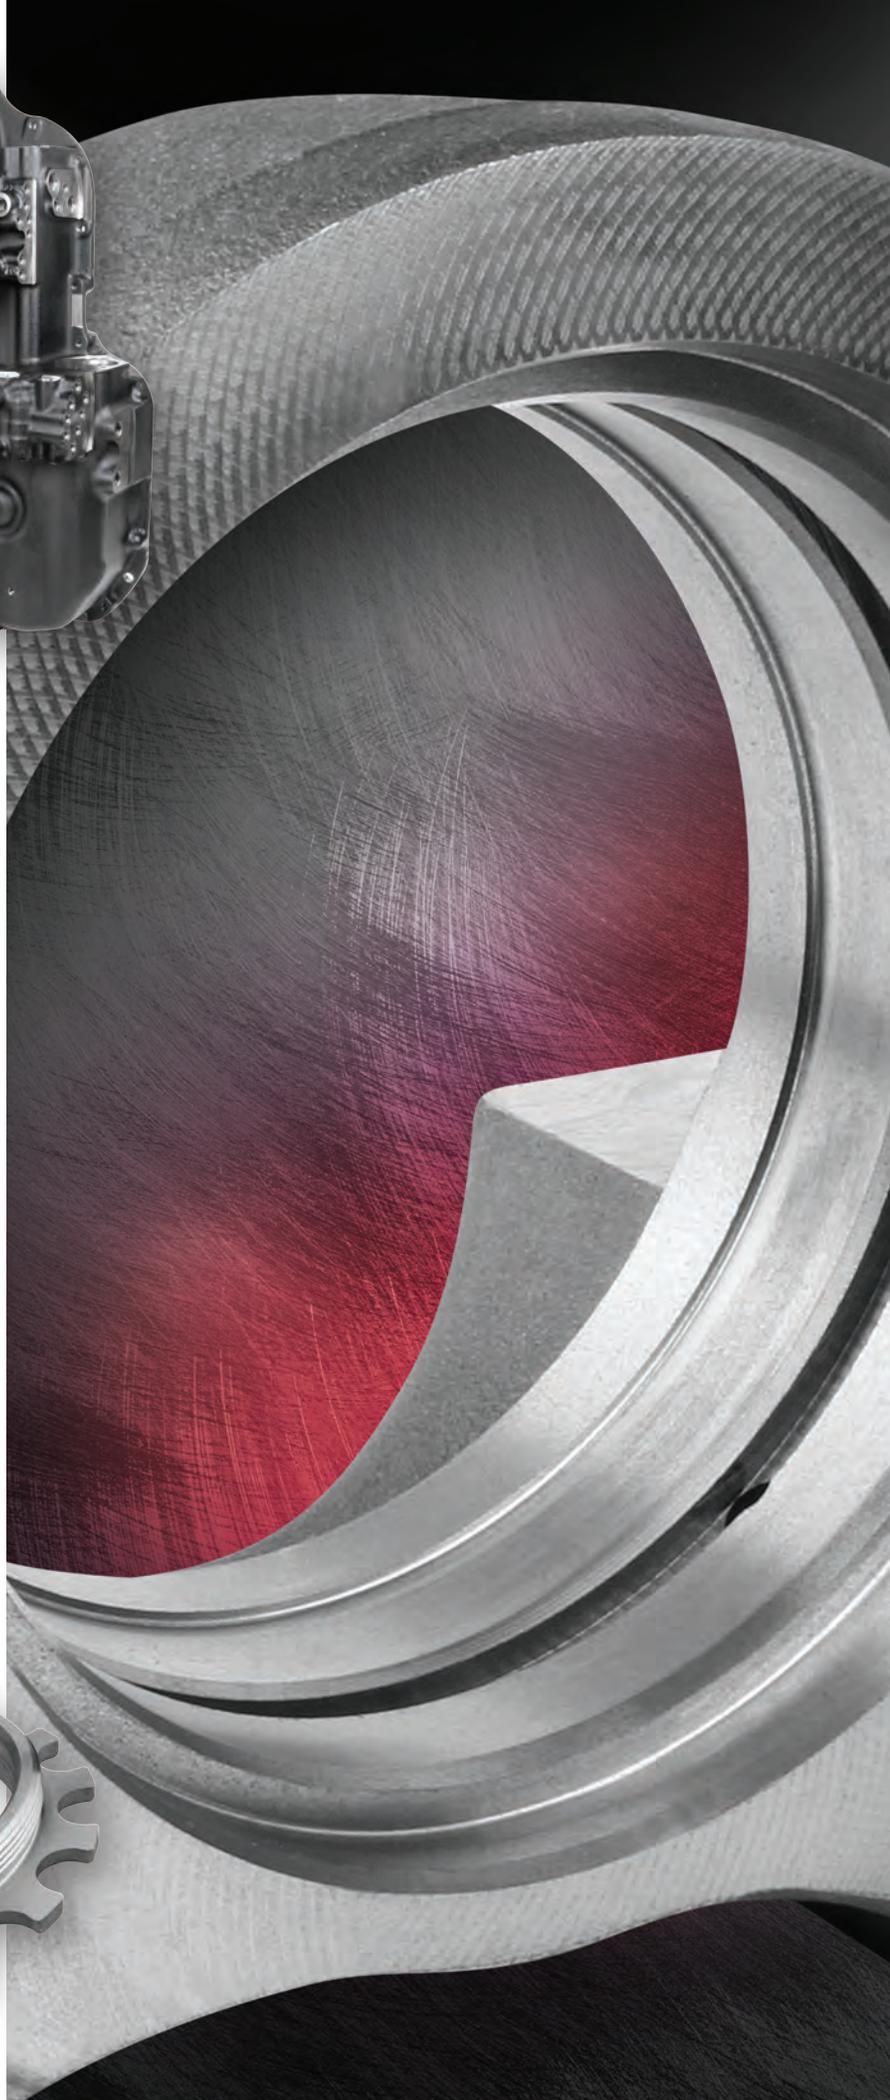

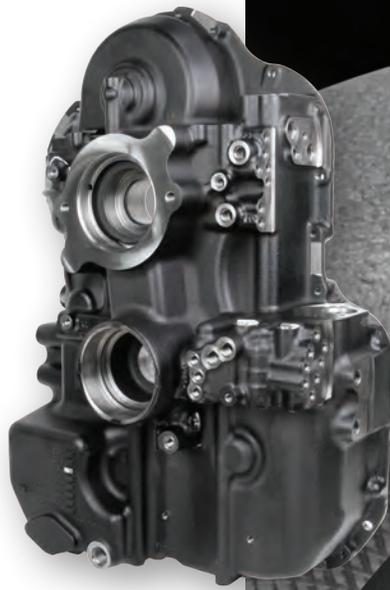

From simple sub-assembly to complete turnkey deliverables, our operation supports all of your assembly requirements while providing tighter quality control, lower costs, and shorter lead times.

Your Industry. Our Expertise

Count on us for quality custom machining of simple to complex parts in all shapes and sizes, ranging from .25 pounds (.12 kg) to 1,600 pounds (725 kg).

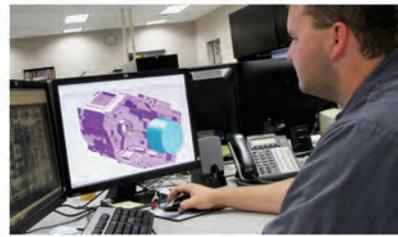

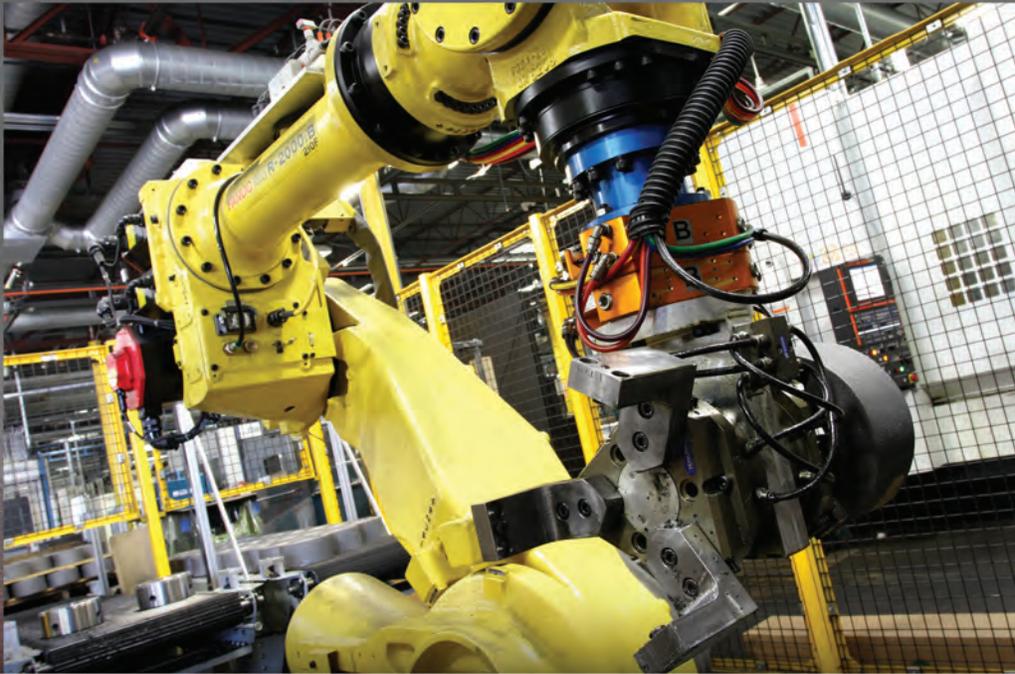

We skillfully serve:

- On-Highway
- Off-Highway
- Engine
- Recreational
- Energy
- Utility

150,000 Square Feet, *Optimized For Your Advantage.*

Our massive 150,000 square feet of manufacturing space optimizes process workflow for the ultimate in production output, worker safety and energy efficiency. From our Clean Room to our sophisticated CNC machines, we feature the latest state-of-the-art technologies.

Our operations are designed to maximize production capabilities in the most cost-effective manner, allowing you to maintain a competitive advantage.
